

VERSA LOK - MOSAIC IV

MOSAIC IV- Dagostino's innovation to the **Versa-Lok System** offers the designer and installer the ability to create the appearance of beautiful natural stone retaining wall patterns with both ease of installation and beauty. The Weathered™ finish units, in either the full 16", the 4" mini and/or with the 6" and 10" combo sizes, can provide installation without a set pattern so every wall is unique. Add the ability to blend coordinated colors or order custom colors and the options are virtually endless. Match with Dagostino's Stockade, DutchStone, English or Vale pavers and complete any design with both economy and beauty.
